Dear Donors,

**Sub: Support for procuring medical equipments for  
BBMP health care facilities**

\*\*\*\*\*

The Government of Karnataka has systematically strengthened all surveillance and containment measures against the possible spread of the second wave of COVID-19. However, as the cases continue to rise in the city and we are seeing increased hospitalization of Covid patients, it is pertinent to appropriately support and upgrade the public health systems infrastructure to manage them. We are grateful for the support of civic society and private sector in this effort till now.

The State government has already planned to upgrade the current public health infrastructure and provide oxygen pipeline systems, including Oxygen generation plants and other facilities. However, since the State is functioning at its full capacity now, we request your support in procurement of oxygen concentrators, oxygen cylinders and NIV ventilators for BBMP Health Care Facilities. These machines are vital for the survival of patients and are essential to manage the COVID-19 pandemic. BBMP proposes to establish Covid patient stabilization centres with such oxygen facilities. The specifications for these equipments are attached for your reference.

For more information, please do get in touch with Sri Sarfaraz Khan, Joint Commissioner, BBMP (Contact No.9448111066) or email us at [jdswwbbmp3@gmail.com](mailto:jdswwbbmp3@gmail.com).

We would greatly appreciate this support at this hour of need.

  
(Gaurav Gupta, I.A.S)  
Chief Commissioner
